## **DAQTRON ACQUIRES DOCSIS PRODUCT LINE OF FILTRONIC SIGNAL SOLUTIONS**

*DAQTron to continue maintenance and development of the FSS DOCSIS product line.*

**ATLANTA — September 13, 2007** — DAQTron, Inc., an industry leader in the implementation of broadband test systems, has announced that it has finalized acquisition of the DOCSIS product line of Filtronic Signal Solutions Sigtek division. DAQTron will continue to sell and support the current DOCSIS product line from DAQTron's headquarters in Atlanta, GA. Additionally, DAQTron is currently proceeding with new product development and upgrades for the FSS DOCSIS products, utilizing development resources located in both the U.S. and in Europe.

The RF Tracer product, the ST-260, is a key component in DAQTron's industry-leading Jupiter testing solution. Jupiter is a custom-tailored DOCSIS 1.x and 2.0 testing solution for broadband data equipment for the cable data transmission industry. Both Jupiter and the ST-260 fully support DOCSIS 2.0. Development is currently ongoing to implement DOCSIS 3.0 in both Jupiter and the ST-260, with a targeted release in the second quarter of 2008.

"The RF Tracer is a key component of our Jupiter solution," said Robert Sandage, President of DAQTron. "Bringing this product line into the DAQTron family was a natural progression of our relationship and new product development provides a convenient upgrade path for our customers"

## **About DAQTron, Inc.**

Atlanta-based DAQTron, Inc. is a proven industry leader in the design and implementation of test systems for the broadband marketplace, with specific strengths in testing equipment for data transmission over cable and testing equipment for digital video broadcast hardware. DAQTron's goal in designing, building, and integrating turn-key test systems is to maximize productivity and profitability for customers. This goal is realized by minimizing test times without sacrificing measurement quality. DAQTron, Inc. is a privately held design and development corporation and has been providing software and hardware test system solutions for thirteen years. DAQTron is a National Instruments Alliance Program member and a National Instruments Select Channel Partner. For more information on DAQTron, visit the Company's web site at [www.DAQTron.com](http://www.DAQTron.com).

## **About Filtronic Signal Solutions**

Filtronic Signal Solutions specializes in high level integration of flexible signal processing hardware, software, microwave design and manufacturing. Filtronic Signal Solutions provides products and systems to the government for use in the signal intelligence (SIGINT), electronics intelligence (ELINT), and electronic warfare (EW) markets. In addition Filtronic Signal Solutions provides commercial systems for the WCDMA cellular and WiMax 802.16 markets.
